

# WINTERIZING YOUR MODEL “A”

- Oil:** Change engine oil, record date or mileage \_\_\_\_\_
- Coolant:** check anti-freeze, or drain radiator and engine, use ethylene glycol, or for storage can use plumbing anti-freeze, don't leave engine empty.
- Fuel:** fill tank (non ethanol – Chevron or Shell premium) and add fuel stabilizer before filling tank, run carb dry.
- Battery:** disconnect leads, clean posts and connectors; connect to battery maintainer type trickle charger.
- Tires:** inflate (35#), and put car on jack stands.
- Grease:** grease all fittings so you're ready for Spring
- Clean:** Wash and wax before storing  
Clean undercarriage and spray with Fluid Film to prevent rust
- Moisture:** Use desiccant, heat source or warm air circulator (RV or marine parts stores) in cab if stored in non heated building.
- Cover :** Use proper soft car cover and leave windows cracked open to prevent mould or mildew.
- Rodent Protection:**  
Bounce fabric softener, Irish Spring soap, Lemon Pledge have been found to be somewhat effective. Plug exhaust pipe with steel wool to prevent mice from getting into engine. Place mousetraps around car if necessary.

Keep a record of what has been done and hang on steering wheel.
